

Lassoued Takwa

Profile

As a third-year software engineering student, my passion for computer science has guided me from the very beginning. Currently, I am in search of an internship for my end-of-studies project (PFE) where I aim to put my skills in web development and programming into practice, which I have acquired through both university and personal projects. My adaptability and ability to work in a team are assets that I am ready to bring to your company. Convinced that this internship will be the ideal opportunity to enhance my knowledge and master new technologies, I am enthusiastic about the prospect of actively contributing to your team.

PROFESSIONAL EXPERIENCES

2021 - 2022

INTERNSHIP IN A COMPANY | 2 MONTHS

Compagnie des phosphates Gafsa CPG

Design and Implementation of QuarryDB with Microsoft Access, dedicated to the management of quarry equipment sub-assemblies. Streamlines traceability, maintenance, and operational efficiency for optimal equipment management.

2022 - 2023

ENGINEER INTERNSHIP | 2 MONTHS

Welyne

The integration of innovative features on the official website using Symfony and JavaScript has significantly enhanced the user experience. This has resulted in performance optimization and increased interactivity.

ACADEMIC PROJECTS

2022 - 2023

- Development of a clinical management application for both desktop and web platforms. Streamlines appointment scheduling, billing, and communication to enhance the efficiency of clinic management.
